

Please don't let The FCC Take this away from me. I am paying for the service so why should you even care. First you take our rights to copy music that is on "public Web Sites" and now you are wanting to take away what i listen to. I can not stand Censored music regardless if its rock, rap or hip-hop. If i am paying for it let it go and just take care of other things that really matter. I love the weather station it gives me 24/7 updates unlike regular radio which is only on during the morning or afternoon commute. I like the fact that when i travel from various cities i can hear what the weather is like any time and if there are any road closing or constructions or even accidents. Can FM do that, I don't think so. That is why i purchased XM to get away from the boring mundane crap talk. its talk for 15 min then music for 5 then more talk. I am paying for what i want not what you want. Next thing you know the FCC will censor XM radio so they can control us. Its all a government thing. Let the public listen to what "WE" tell them!
